## Announcement

### **CKW & ASSOCIATES TO BUILD FIRST LEED CERTIFIED MEDICAL FACILITY IN CHEROKEE COUNTY**

ATLANTA, GA, February 18, 2010 – CKW & Associates of Atlanta, Georgia announced plans for the first LEED certified building in Woodstock and the first medical facility in Cherokee County. Dr. Michael Pratt of Woodstock ENT is the owner of the property. CKW & Associates is providing construction management services.

“This will be a showcase medical facility,” said Todd Cohen, partner of CKW & Associates. “It’s truly a dream born out of the commitment of Dr. Pratt in one of the most dynamic and growing areas of greater metropolitan Atlanta.” Located off Highway 92 in between Interstate 575 and downtown Woodstock this 4,600 square foot private ear, nose and throat practice is registered with GBCI. Programming and design is well underway and ground breaking is expected May 1, 2010.

Woodstock ENT will be a signature project and will utilize multiple strategies to attain this Silver LEED status including recycled goods, energy efficient mechanical systems, and maximizing existing site conditions. “This project is an outstanding opportunity for us and construction of this facility reflects a very significant area of expertise for us, especially in terms of aligning our capabilities with the green market,” said Cohen. “We look forward to bringing the vision of the Dr. Pratt to reality.”
